

INTRODUCTION

 SIG is committed to improving the health and wellbeing of people living in rural communities across the country and has approved rural WASH policy:

VISION "All Solomon Islanders will have easy access to sufficient quantity and quality of water, appropriate sanitation and will be living in a safe and hygienic environment by 2024"

• The Rural WASH (RWASH) program within the Environmental Health Division (EHD) of MHMS leading the implementation of the Policy through the Strategic Plan.

- RWASH Policy Feb 2014
- RWASH Strategic Plan Mar 2015

RURAL WASH STRATEGIC PLAN

Objective 1
Improved
WASH
services in
communities

Objective 2
Improved
sanitation and
hygiene
nationally

Objective 3 WASH Sector Reform

Capital funding - will be provided by MHMS for communities, schools and health clinics

'Service Delivery Partners' will deliver the Infrastructure engaged through open tender process and using MHMS Guidelines

Community Engagement Guidelines

– to implement projects and
support capacity development to
operate and maintain the
infrastructure

No subsidy - funding will be NOT be provided by MHMS for household toilets

Creating a demand for sanitation - Community Led Total Sanitation (CLTS) will be rolled out across the country – so that individuals will build and use toilets themselves

Hygiene communication – focused on people washing their hands with soap at critical times

WASH Marketing – ensure supply chain is there to support the process

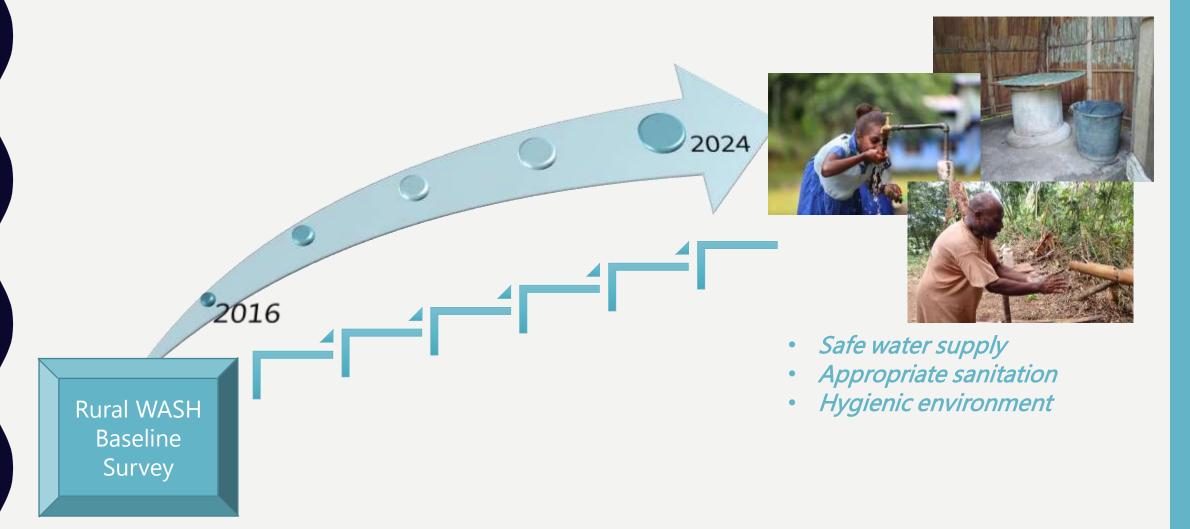

RWASH program – within the Environmental Health Division (EHD) of MHMS will be responsible for delivery of the plan and oversight of the WASH sector

Provincial EHD/HPU - responsible for overseeing and monitoring service delivery partners and supporting CLTS

Strengthen systems and capacity – to support implementation of the plan, monitoring and evaluation system

AIM STRATEGIC PLAN

100% COVERAGE

RURAL WASH BASELINE SURVEY

- Successfully completed in December 2015 on time and under budget.
 - Carried out by our own staff and resources, using our own systems and budget to provide a statistically representative assessment of the rural WASH coverage for the county.
- Approximately 60 people, predominantly EHD staff at National and Provincial level
 - Formed 16 survey teams
 - Carried out surveys for six weeks,
 - 84 Enumeration Areas (EAs) across all 9 Provinces.
- Using 'smart phones' the 16 survey teams collected:
 - 1,739 Household WASH surveys
 - 71 School WASH surveys
 - 28 Health Facility WASH surveys

ISABEL SURVEY

Required 5 Enumeration Areas (EA)

1 EA uncompleted

Collected:

79 household surveys

0 Health clinic surveys

6 School surveys

OUTCOME - NATIONAL RURAL WASH COVERAGE

Hygiene Water 54% 16% Appropriate hand washing facilities (with Access to improved water sources (available water and soap) within 30min) Sanitation 13% Management 13% Access to an improved type sanitation Households reporting that their drinking facility (private not shared) water source (improved or unimproved) is managed by an active WASH committee

PROVINCIAL RURAL WASH COVERAGE

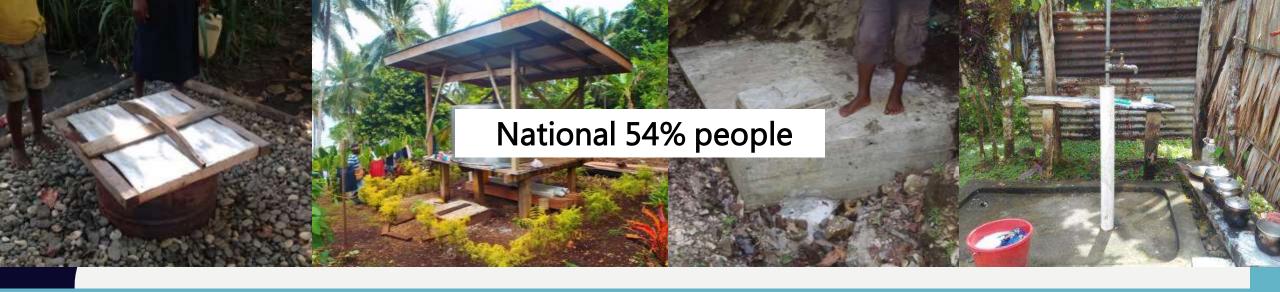

SUMMARY	Central	Choiseul	Guadalcanal	Isabel	Makira	Malaita	Ren-Bell	Temotu	Western
(Population*)	(24,567)	(25,133)	(73,886)	(23,706)	(36,532)	(117,211)	(5,895)	(16,025)	(63,532)
Water	57%	63%	43%	90%	63%	48%	100%	44%	56%
Sanitation	3%	6%	14%	6%	11%	15%	45%	10%	16%
Hygiene	8%	6%	9%	3%	21%	11%	5%	12%	44%
Management	24%	3%	6%	32%	19%	18%	3%	4%	7%

^{*}population numbers from 2009 census

WATER IN RURAL SOLOMON ISLANDS

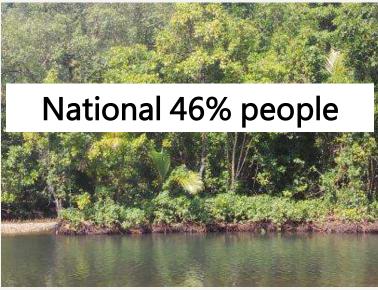

What about water

IMPROVED WATER SUPPLY – water that is adequately protected the from outside contamination, in particular from faecal matter

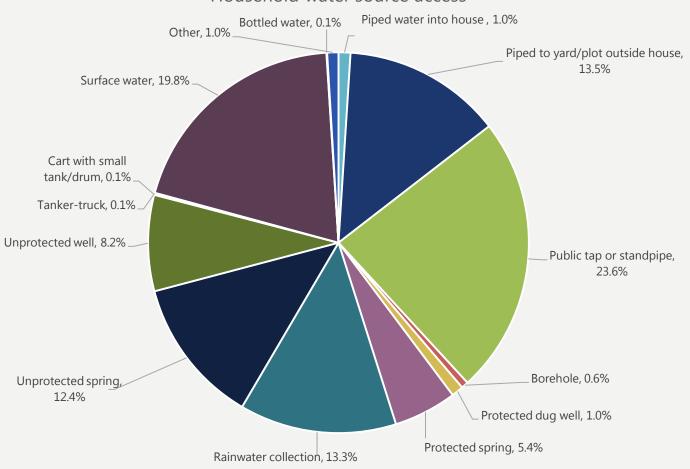

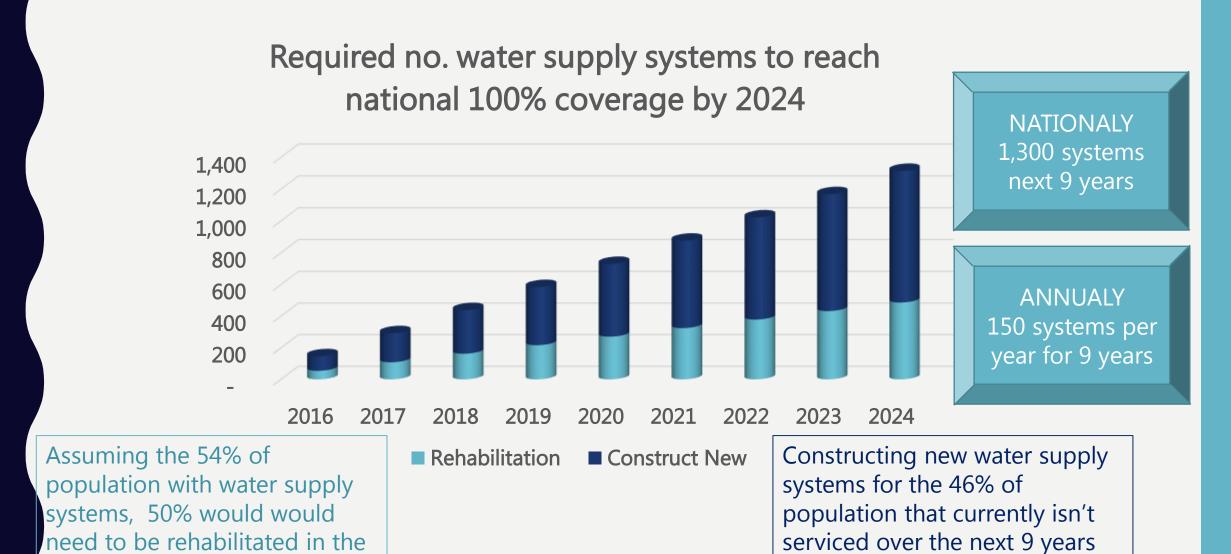

PRIMARY DRINKING WATER SOURCES

TO REACH 100% WATER COVERAGE

next 9 years

PLAN: DELIVER WASH

Objective 1
Improved
WASH
services in
communitie

- Capital funding will be provided by MHMS for communities, schools and health clinics
- 'Service Delivery Partners' will deliver the Infrastructure engaged through open tender process and using MHMS Guidelines
- Community Engagement
 Guidelines to implement
 projects and support capacity
 development to operate and
 maintain the infrastructure

- AIM: Improved access to clean water and sanitation facilities in
 - Rural communities
 - Schools
 - Health clinics; and
 - Public institutions
- There is lots to do we don't have the resources to do it on our own
 - Contract 'Service Delivery Partners' to HELP
- Sustain outcomes using Community Engagement Guidelines

NATIONAL ANNUAL OPERATIONAL PLAN 2016

TOTAL

WATER SYSTEMS	AOP 2016	Strategic Plan (per year 9 yr)	Performance Indicator
Rehabilitation (Delivered by RWASH)	35	54	17.5
Construct New (Delivered by Service Delivery	14	92	16
Partners)	49	146	33.5

ACTION – need to deliver the planned systems and support other WASH projects in the Province

WASH sector NEEDS to deliver remaining 34 systems

2016 TARGET is 67 water systems

SANITATION IN RURAL SOLOMON ISLANDS

TODAY lets talk about 'behind the house'

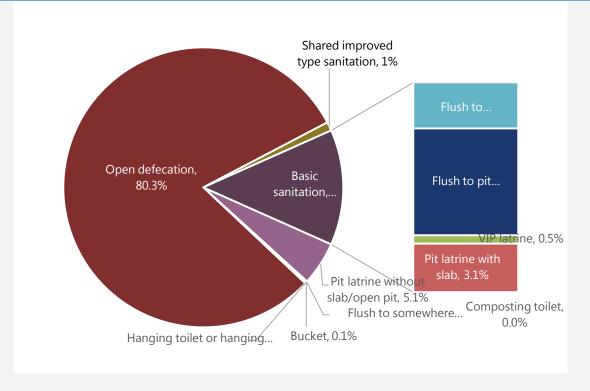

NATIONAL - Unimproved sanitation (open pit) used by 5% people

Improved sanitation – toilets that hygienically separate human excreta from human contact

Accounts for 1 in 4 child deaths in Solomon Islands

...causes cholera, typhoid, hepatitis, polio, diarrhea, worm infestation, reduced physical growth, impaired cognitive function and under nutrition

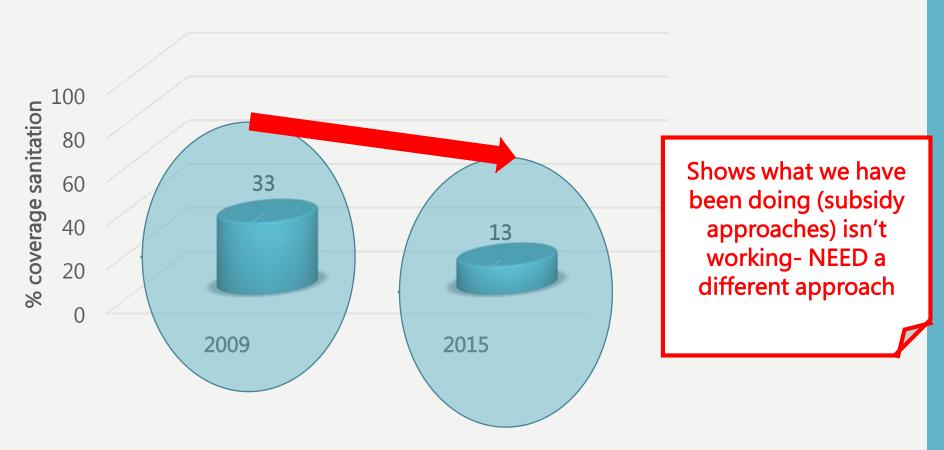

Child malnutrition & stunting rate of 32.8% in Solomon Islands

REDUCING your child's ability to:

- Learn
- Achieve an education
- Future productivity
- Income-earning potential

SANITATION HISTORY

Percentage coverage appropriate sanitation in Solomons

PLAN: SANITATION & HYGIENE

Objective 2
Improved
sanitation
and hygiene
nationally

- No subsidy funding will be NOT be provided by MHMS for household toilets
- Creating a demand for sanitation
 Community Led Total Sanitation
 (CLTS) will be rolled out across the country so that individuals will build and use toilets themselves
- Hygiene communication –
 focused on people washing their
 hands with soap at critical times
- WASH Marketing ensure supply chain is there to support the

- AIM: Improved access to and use of sanitation facilities and hygiene practices in every rural household and community
- Community Total Led Sanitation (CLTS)
 - Empowering/motivating communities to become No Open Defecation (NOD)
 - Internationally shown to be most sustainable approach
- Shifting 'mind set' to have CHANGE IN BEHAVIOUR
 - Sanitation and hygiene behaviours
- WASH Marketing supply chains and training

NATIONAL ANNUAL OPERATIONAL PLAN 2016

SANITATION	AOP 2016	Strategic Plan (per year 9 yr)	Performance Indicator
CLTS Triggering (Facilitated RWASH/HPU and	100 (2%)	556 (11%)	20%
No Open Defecation	2%	11%	13%
(Declared by MHMS)	50,000-	50,000-	53,200
Population with Access Improved Sanitation (RWASH Baseline)	55,000	55,000	

ACTION: Change starts here in this room

ISABEL
Trigger 30
communities per year

LEAD BY EXAMPLE

- Work with everyone to have WASH:
 - Communities/villages
 - Schools
 - Health clinics;
 - Public institutions
- Changing 'mind set' to change behaviour of all

SHARING TIME 'story time'

- Is Open Defecation a problem?
- What sanitation facilities do you use?

HYGIENE IN RURAL SOLOMON ISLANDS

Who's washing their hands

WHAT IS HYGIENE

- Refers to behaviours that encourage the widespread adoption of safe hygiene practices in order to:
 - Keep people and their environment clean,
 - Enhance dignity,
 - Prevent spread of diseases,
 - Reduce under-nutrition and maintain health.
- Rural WASH baseline focused on Handwashing with water and soap at critical times

6 Key hygiene behaviours includes

- 1. Handwashing with water and soap at critical times,
- 2. Safe and hygienic management of human excreta (sanitation)
- 3. Cleanliness of sanitation facilities,
- 4. Safe domestic water management from source to the point of consumption, (safe drinking water supplies)
- 5. Food hygiene,
- 6. Menstrual hygiene and its management.

HANDWASHING

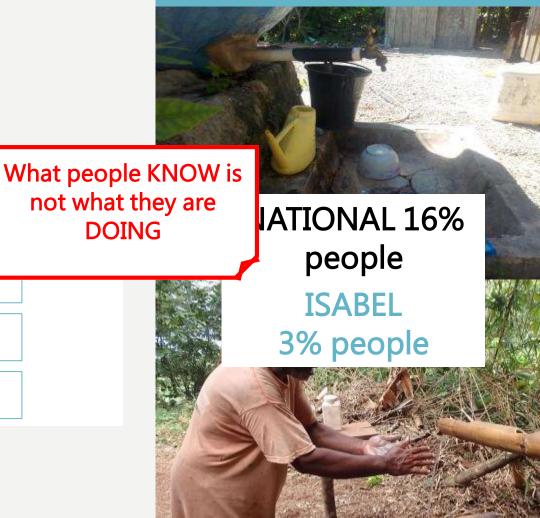

HIGH Knowledge of handwashing

NATIONAL

After
cleaning
belove 28%
preparing
food, 74%
Before eating
food, 93%

After going
toilet, 88%

People with handwashing facilities (with water and soap)

WASH AND HEALTH

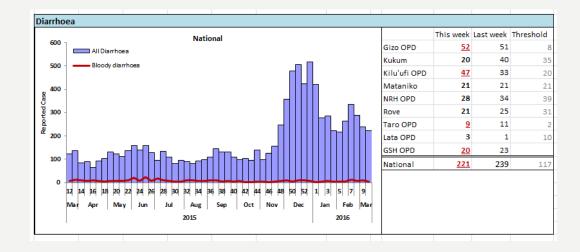

Rotavirus Outbreak 2015-16

- >9,000 cases of diarrhoea reported during the outbreak
- Provisional 30 deaths

Key Messages (PREVENT OUTBREAKS)

 We need to increase practice (actions) with knowledge of good hygiene

KNOWLEDGE INTO ACTION

MANAGEMENT IN RURAL SOLOMON ISLANDS

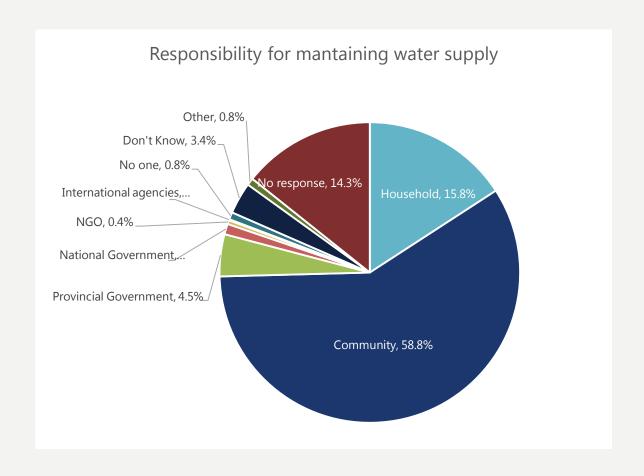

Operation and maintenance

RESPONSIBILITY FOR MAINTAINING

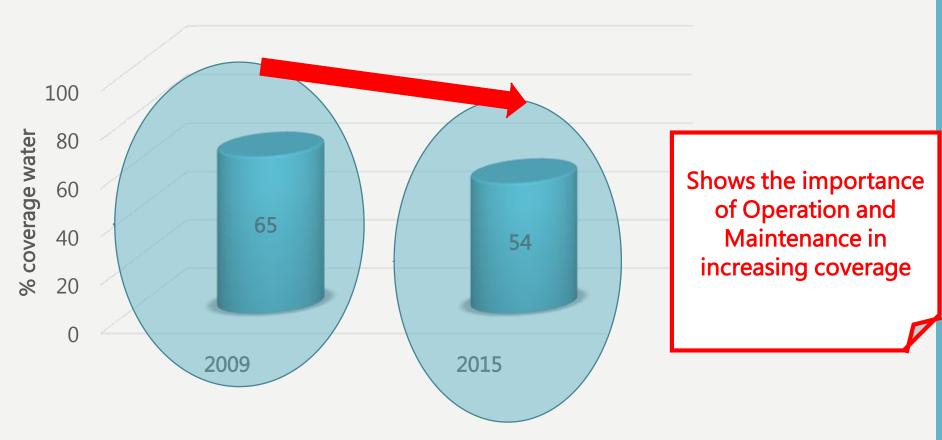

While most communities are aware of their responsibly for maintaining their water supplies

 Nationally ONLY 13% report having Active WASH Committees

WATER HISTORY

Percentage coverage improved water supplies in rural Solomons

PLAN: DELIVER SECTOR REFORM

Objective 3 WASH Sector Reform

- RWASH program within the Environmental Health Division (EHD) of MHMS will be responsible for delivery of the plan and oversight of the WASH sector
- Provincial EHD/HPU responsible for overseeing and monitoring service delivery partners and supporting CLTS
- Strengthen systems and capacity

 to support implementation of the plan, monitoring and

- AIM: Change the way WASH sector stakeholders are organised and work together to improve the efficiency and sustainability of the rural WASH service delivery
 - Provincial Health is the ROCK (long-term on-going support and oversight, achieve improved lives for people)
 - Oversight project delivery
 - Monitor, evaluate and report progress (Monitoring & Evaluation system)
 - Provide on-going support to communities to improve capacity to operate and maintain systems (Most Important role)
 - Service delivery Partners increasingly deliver WASH systems (rehabilitated and new)

evaluation system

WHERE TO FROM HERE

National Government

- LEAD the implementation of the Strategic Plan Communicate and coordinate WASH sector
- Strengthen systems to deliver the Strategic Plan Procurement, Financial and establish Monitoring System

Provincial Government

- Make financial provisions for supporting Community Based Management
- Coordinate with National and stakeholders

WASH Stakeholders

Coordinate with Provincial Government

Provincial RWASH

- Already doing a GREAT JOB Delivering the plan water supply systems and supporting Community Based Management
- FOCUS: On sanitation (get this as high as water coverage) and MONITORING

2016

Current Projection
2019

2016

60% WATER 20% SANITATION & HYGIENE COVERAGE

ACTION:

- Deliver the existing plan
- Demonstrate ability to Perform
- Provides the basis to advocate for more investment and resources

THANK YOU

- MHMS Environmental Health Division
- Provincial Health Sector
- Collaborative partners
 - WaterAid Solomon Islands,
 - UNICEF Solomon Islands/Fiji and
 - Australian Department of Foreign Affairs and Trade (DFAT)
